## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-50 and 68-74, drawn to a needle assembly, classified in class 606, subclass 185
  - II. Claims 51-67, drawn to method of assembling a needle assembly, classified in class 604 subclass 523.
2. The inventions are distinct, each from the other because of the following reasons:  
Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process (MPEP § 806.05(e)). In this case the assembly process as claimed can be practiced by another and materially different apparatus such as assembling a therapeutic balloon catheter assembly wherein the catheter is use for carrying and deploying at least one needle for delivery of drug.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3731

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
5. **Due to the complexity of this requirement, no solicitation of an oral election was made. This requirement is being sent out by mail only.**
